

Grant access from anywhere

M Series (M5/M6)

Digital Door Lock

You can now remotely unlock your door from anywhere and can even share the digital key to any visitors. Designed for luxury apartments and houses, the dormakaba M series offers no compromise when it comes to reliability and performance, security, dependability and versatility in a modern design and finish.

Mobility application is an extremely convenient function for users who can receive push notifications anytime the door lock is used, you can remotely share the digital key or PIN, open the door and check the history record of the lock.

Anytime the digital door lock is used TAS sends a notification to your smart device. Making life safer and easier! You can also get notifications on access logs / history and alarms (low battery, tamper, wrong pin, mechanical key).

You won't need keys anymore

M Series eliminates issues commonly associated with mechanical keyed locks. It's easy to misplace keys or accidentally lock them inside your home. This isn't a problem with the M Series.

Multiple locking methods for multiple users

The dormakaba M series supports a variety of secured unlocking methods. Instead of having to make multiple keys for your home; it's easy to program the M locks for multiple users. This means that you can easily program the lock so it can be used by trusted friends and family members without risking your home security.

Visitor friendly with optional passage mode

Expecting unregistered guests or even just working out in garden? Passage mode can be activated via a switch on internal housing allowing free access when active.

Advantages at a glance:

- Grant access from anywhere
- Share a secure PIN
- Remotely open the door lock
- Know the door status at anytime or anywhere
- Anytime the door lock is used TAS sends a notification to your smart device
- Door remains unlocked on the inside, locked on the outside
- Automatically locks when you close the door

M5 Model:

The M5 digital door lock features a Card Key entry or PIN Code entry system, remote control for added flexibility and mechanical key override.

M6 Model:

The M6 digital door lock features a Fingerprint entry, Card Key entry or PIN Code entry system, remote control for added flexibility and mechanical key override.

Having the right security has never been more important

Smart phone control for your access

dormakaba M series offers smart phone access for M locks. The superbly engineered wireless module can control access precisely for visitors/normal users/or short period stay users according to specific places and time periods. You set the access rights and can then change them quickly and flexibly, in standalone or wireless mode

Adapts to you

Digitalize your access with this new digital door lock M series while continuing to independently use the mechanical key system. You can carry on using your lever handle and – depending on the installation situation – you can also keep
